

# Sql update

- - Tracks all in-flight reservations with TTL

```
CREATE TABLE xp_reservations (  
  id UUID PRIMARY KEY DEFAULT gen_random_uuid(),  
  user_id UUID REFERENCES users(id),  
  amount INTEGER NOT NULL,  
  feature TEXT NOT NULL,  
  status TEXT DEFAULT 'active',  
  created_at TIMESTAMP DEFAULT now(),  
  expires_at TIMESTAMP DEFAULT now() + INTERVAL '15 minutes'  
);
```

- - Dead letter queue for failed cancellations

```
CREATE TABLE dead_letter_reservations (  
  id UUID PRIMARY KEY DEFAULT gen_random_uuid(),  
  user_id UUID REFERENCES users(id),  
  amount INTEGER NOT NULL,  
  reason TEXT,  
  created_at TIMESTAMP DEFAULT now(),  
  resolved_at TIMESTAMP,  
  status TEXT DEFAULT 'pending'  
);
```
